

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the present application.

Listing of Claims:

1. (Currently Amended) A fungicidal mixture for ~~controlling rice pathogens,~~
comprising

1) the triazolopyrimidine derivative of the formula,

I

and

2) an acryloylmorpholide of the formula II,

II

in which X is chlorine or fluorine,

in a synergistically effective amount.

2. **(Previously Presented)** A fungicidal mixture as claimed in claim 1, comprising the compound of the formula I and the compounds of the formula II in a weight ratio of from 100:1 to 1:100.

3. **(Currently Amended)** A fungicidal mixture as claimed in claim 1, comprising, as acryloylmorpholide, dimethomorph of the formula IIa

4. **(Previously Presented)** A fungicidal composition comprising a liquid or solid carrier and a mixture as claimed in claim 1.

5. **(Previously Presented)** A method for controlling harmful fungi which are rice pathogens, which comprises treating the fungi, their habitat or the plants, the soil or the seeds to be protected against fungal attack with a synergistically effective amount of the compound I and one of the compounds II as set forth in claim 1.

6. **(Canceled)**

7. **(Previously Presented)** A method as claimed in claim 5, wherein the mixture is applied in an amount of from 5 g/ha to 1500 g/ha.

8-9. **(Canceled)**

10. **(Previously Presented)** Seed, comprising the mixture as claimed in claim 1 in an amount of from 1 to 1000 g/100 kg.

11. **(Previously Presented)** A method for preparing a composition containing a fungicidal mixture as set forth in claim 1 which comprises combining the fungicidal mixture with a liquid or solid carrier.

12. **(Previously Presented)** A fungicidal composition comprising a liquid or solid carrier and a mixture as claimed in claim 2.

13. **(Previously Presented)** A fungicidal composition comprising a liquid or solid carrier and a mixture as claimed in claim 3.

14. **(Previously Presented)** A method for controlling harmful fungi which are rice pathogens, which comprises treating the fungi, their habitat or the plants, the soil or the seeds to be protected against fungal attack with an effective amount of the compound I and one of the

compounds II as set forth in claim 2, wherein the mixture is applied in an amount of from 1 to 1000 g/100 kg of seed.

15. **(Previously Presented)** A method for controlling harmful fungi which are rice pathogens, which comprises treating the fungi, their habitat or the plants, the soil or the seeds to be protected against fungal attack with an effective amount of the compound I and one of the compounds II as set forth in claim 3, wherein the mixture is applied in an amount of from 1 to 1000 g/100 kg of seed.

16. **(Canceled)**

17. **(Previously Presented)** A method for controlling harmful fungi which are rice pathogens, which comprises treating the fungi, their habitat or the plants, the soil or the seeds to be protected against fungal attack with an effective amount of the compound I and one of the compounds II as set forth in claim 3, wherein the mixture is applied in an amount of from 1 to 1000 g/100 kg of seed, and wherein the compounds I and II are applied simultaneously, that is jointly or separately, or in succession.

18-19. **(Canceled)**

20. **(Previously Presented)** The fungicidal mixture of claim 1, wherein the weight ratio of the compound of formula I to the compound of formula II is in the range from 20:1 to 1:20.

21. (Previously Presented) The fungicidal mixture of claim 1, wherein the weight ratio of the compound of formula I to the compound of formula II is in the range from 10:1 to 1:10.

22. (New) A method for controlling harmful fungi which are rice pathogens, which comprises treating the fungi, their habitat or the plants, the soil or the seeds to be protected against fungal attack with a synergistically effective amount of the compound I and one of the compounds II as set forth in claim 1,

wherein said pathogen is at least one species selected from the group consisting of *Septoria* and *Puccinia*.

23. (New) A method for controlling harmful fungi which are rice pathogens, which comprises treating the fungi, their habitat or the plants, the soil or the seeds to be protected against fungal attack with a synergistically effective amount of the compound I and one of the compounds II as set forth in claim 1,

wherein said pathogen is at least one species selected from the group consisting of *Alternaria* and *Boytritis*.

24. (New) The method of claim 22, wherein the weight ratio of the compound of formula I to the compound of formula II is in the range from 20:1 to 1:20.

25. (New) The method of claim 23, wherein the weight ratio of the compound of formula I to the compound of formula II is in the range from 20:1 to 1:20.
